Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	30 September 2026
Team ID	9100TeamTrio
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Ticket Creation	Caller enters the Caller Name Caller enters the Short Description of the issue Ticket is saved in the custom ticket table
FR-2	Auto Classification (Flow Designer)	Flow is triggered when a ticket is submitted Short Description is checked for the keywords WiFi, Projector, Password / Login and Slow / Hanging Category and Subcategory are assigned automatically
FR-3	Category and Subcategory Configuration	WiFi → Network / WiFi; Projector → Hardware / Projector Password or Login → Access / Forgot Password Slow or Hanging → Performance / Slow Computer Subcategory choices depend on the selected Category
FR-4	Email Notification	Caller is informed by email about the ticket creation
FR-5	Security and Access Control	Only authorized users can access or modify ticket data
FR-6	Testing and Deployment	Test scenarios for each keyword rule Update Set is made Complete and deployed to the target environment

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The caller only enters the Caller Name and Short Description; no category or subcategory has to be selected, so the ticket form is simple for students and teachers.
NFR-2	**Security**	Roles and access control rules (ACLs) ensure that only authorized users can access or modify ticket data.
NFR-3	**Reliability**	Rule-based classification gives the same result for the same keyword every time, which eliminates human error in classification.
NFR-4	**Performance**	The flow runs automatically when a ticket is submitted, so no manual review is needed before the Category and Subcategory are assigned.
NFR-5	**Availability**	The solution runs on the ServiceNow cloud platform, so the automation is available whenever the helpdesk instance is available.
NFR-6	**Scalability**	The flow handles an increasing number of tickets without extra effort from IT staff, and new keywords or categories can be added easily in Flow Designer.
