Ideation Phase
Empathize & Discover

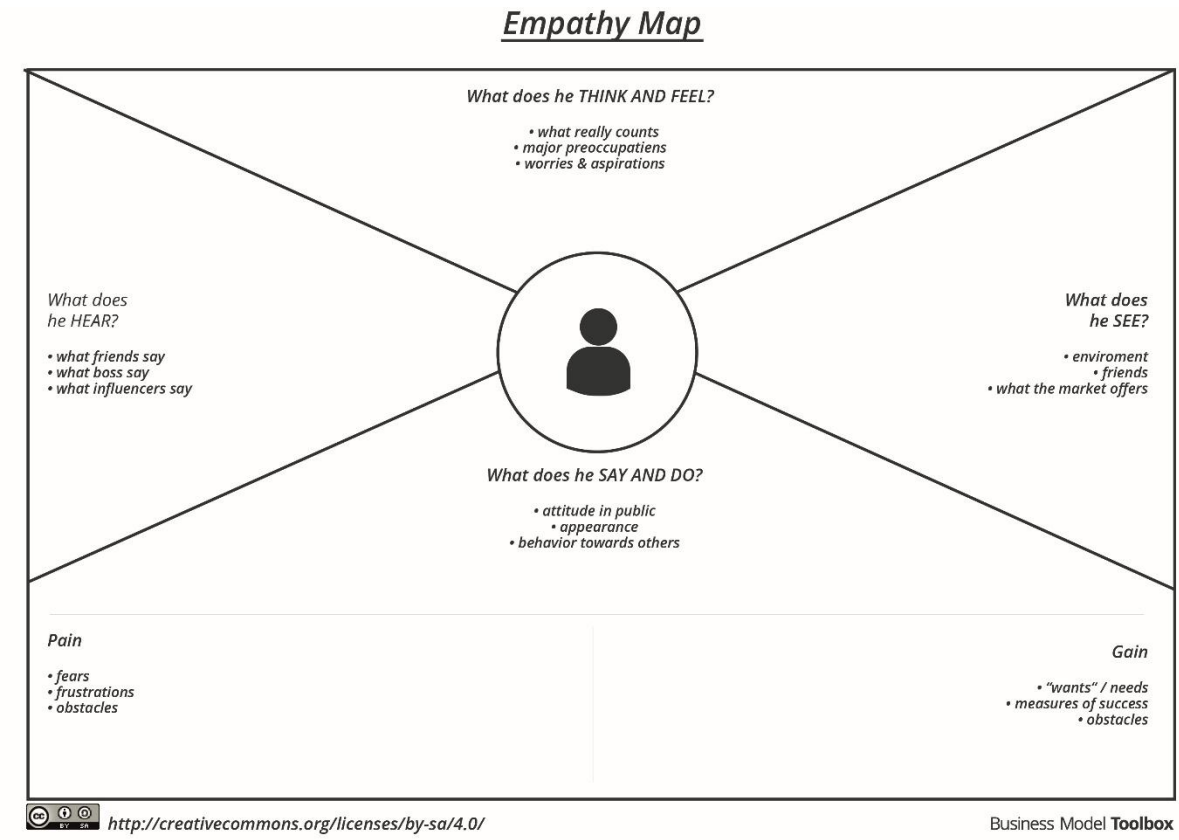

Date	30 September 2026
Team ID	9100TeamTrio
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: Auto Ticket Classification using Flow Designer (School IT Helpdesk)

Empathy Map - Student / Teacher raising an IT support ticket

HEARS

- IT staff are busy with many requests
- "Please raise a ticket"
- Others also wait long for a fix

THINKS & FEELS

- Will my ticket be seen quickly?
- Which category should I pick?
- Worried about losing class time

SAYS & DOES

- "My WiFi is not working" / "Projector is not on"
- "I forgot my password" / "System is slow"
- Submits a ticket and follows up with IT staff

SEES

- A long list of categories and subcategories
- Pending tickets in the queue
- Classmates facing the same issues

PAINS

- Confusion in choosing the right category
- Delay because tickets are reviewed manually
- Wrong or inconsistent classification
- No quick confirmation of ticket creation

GAINS

- Only enter Caller Name and Short Description
- Category and Subcategory assigned automatically
- Faster, consistent ticket handling
- Quick notification that the ticket is created
