

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	30 September 2026
Team ID	
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Collaboration

The team met to discuss the daily support requests received by the school IT helpdesk and agreed to focus on automating the manual ticket classification process.

Selected problem statement

The school IT helpdesk receives multiple support requests every day from students and teachers (network connectivity, hardware failures, account access problems and system performance issues). IT staff manually review each ticket to identify the issue type, select the correct category and subcategory, and inform the caller. This manual process is time-consuming, error-prone and not scalable as the number of requests increases.

Step-2: Brainstorm, Idea Listing and Grouping

Grouped ideas

Step-3: Idea Prioritization
